

User Stories

As an administrative user,

- I want to upload files and folders from my computer, by browsing or by drag and drop.
- I want to upload files and folders from cloud services.
- I want to upload a folder with all its content.
- I want to preview uploaded files.
- I want to decide for every file and folder which users that has access to view or share it so that:
 - users without view access to a file can't see it in his client view,
 - users without share access to a file can't share it.
- I want to decide which user who has permission to move files and folders.
- I want to change the layout of the grid view so that:
 - If I resize the scene the amount of visible files and folders will be automatically adjusted.
- I want to change the number of rows so that:
 - the thumbnails resize automatically to fit the number of rows.
- I want to create folders.
- I want to change the picture of folders.
- I want to save user statistics for the files.
- I want to change the mail server. so that:
 - users share files via my chosen mail server.
- I want to choose which files the user has to download at the first sync and which to be synced later when needed. so that:
 - users do not have to sync large amount files if they are in a hurry or have a bad internet connection.
- I want to change the background layout.
- I want to change the font.
- I want to change the size of fonts, thumbnails and folders.
- I want to add scenes and link them together.

As a client user,

- I want to open and close files and folders.
- I want to create folders if I have permission to.
- I want to move files between folders if I have permission to.
- I want to select files and folders.
- I want to share selected files and folders by mail.
- I want to share selected files and folders by sharing the app.
so that:
 - non-selected files does not get shared,
 - the shared files from different scenes can be merged into one scene, or
 - the shared app still have the same scene setup.
- I want to sync files and folders.
- I want to see unsynced files and folders
so that
 - I can sync them.
- I want to select my favorite files
so that
 - they are added to the favorite folder
- I want to open all file formats except powerpoint with the corresponding native app.
- I want to change between list and grid view.
